CHEMISTRY AND PHYSICS OF LIPIDS

Subject index

Volume 101 (1999)

Actin filament; Membrane phospholids; Plasma **101**, 81

Actin; Phosphoinositide; Cytoskeleton; Gelsolin; PIP_2; Lipid–protein complex **101**, 93

Alkaline phosphatase; Enzyme kinetics; Periplasm; Beta-lactamase; Surface catalysis **101**, 37

Amphotericin B; Dilauroylphosphatidylcholine membranes; Nystatin; Circular dichroism; Binding equilibria; Fluorescence microscopy **101**, 223

Beta-lactamase; Enzyme kinetics; Periplasm; Alkaline phosphatase; Surface catalysis **101**, 37

Binding equilibria; Dilauroylphosphatidylcholine membranes; Amphotericin B; Nystatin; Circular dichroism; Fluorescence microscopy **101**, 223

Cationic GUV; DNA interactions; Microinjection; Sphingosine; Endocytosis **101**, 123

Ceramide signaling; Membranes; Proteins **101**, 109

Charged lipids; Membrane electrostatics; Molecular recognition; Surface specificity **101**, 3

Circular dichroism; Dilauroylphosphatidylcholine membranes; Amphotericin B; Nystatin; Binding equilibria; Fluorescence microscopy **101**, 223

Conjugated keto-allene fatty ester; NMR spectroscopy; Pyrazole derivatives; Synthesis; Ultrasound **101**, 237

Cytoskeleton; Phosphoinositide; Actin; Gelsolin; PIP_2; Lipid–protein complex **101**, 93

Dilauroylphosphatidylcholine membranes; Amphotericin B; Nystatin; Circular dichroism; Binding equilibria; Fluorescence microscopy **101**, 223

Di-thio phospholipid analogs; Fattyalkylthio propanols; Lung surfactants **101**, 215

DNA interactions; Cationic GUV; Microinjection; Sphingosine; Endocytosis **101**, 123

Endocytosis; DNA interactions; Cationic GUV; Microinjection; Sphingosine **101**, 123

Enzyme kinetics; Periplasm; Alkaline phosphatase; Beta-lactamase; Surface catalysis **101**, 37

Fattyalkylthio propanols; Di-thio phospholipid analogs; Lung surfactants **101**, 215

Fluorescence microscopy; Dilauroylphosphatidylcholine membranes; Amphotericin B; Nystatin; Circular dichroism; Binding equilibria **101**, 223

Fluorescence polarisation; Keratinocytes; Plant sterols **101**, 255

Fluorescent probes of polarity; Membrane fluorescent probes; Membrane–water interface; Membrane surface polarity **101**, 57

Gelsolin; Phosphoinositide; Cytoskeleton; Actin; PIP_2; Lipid–protein complex **101**, 93

Keratinocytes; Plant sterols; Fluorescence polarisation **101**, 255

Lateral pressure profile; Lipid bilayers; Lipid–protein interactions **101**, 45

Lipid bilayers; Lateral pressure profile; Lipid–protein interactions **101**, 45

Lipid–protein complex; Phosphoinositide; Cytoskeleton; Actin; Gelsolin; PIP_2 **101**, 93

PII: S0009-3084(99)00104-8

Lipid–protein interactions; Lateral pressure profile; Lipid bilayers **101**, 45

Lung surfactants; Fattyalkylthio propanols; Di-thio phospholipid analogs **101**, 215

Membrane electrostatics; Charged lipids; Molecular recognition; Surface specificity **101**, 3

Membrane fluorescent probes; Membrane–water interface; Membrane surface polarity; Fluorescent probes of polarity **101**, 57

Membrane phospholids; Actin filament; Plasma **101**, 81

Membranes; Ceramide signaling; Proteins **101**, 109

Membrane surface polarity; Membrane fluorescent probes; Membrane–water interface; Fluorescent probes of polarity **101**, 57

Membrane–water interface; Membrane fluorescent probes; Membrane surface polarity; Fluorescent probes of polarity **101**, 57

Metal–ligand lipid conjugate; Resonance energy transfer; Model membrane **101**, 243

Microinjection; DNA interactions; Cationic GUV; Sphingosine; Endocytosis **101**, 123

Model membrane; Resonance energy transfer; Metal–ligand lipid conjugate **101**, 243

Molecular recognition; Charged lipids; Membrane electrostatics; Surface specificity **101**, 3

NMR spectroscopy; Conjugated keto-allene fatty ester; Pyrazole derivatives; Synthesis; Ultrasound **101**, 237

Nystatin; Dilauroylphosphatidylcholine membranes; Amphotericin B; Circular dichroism; Binding equilibria; Fluorescence microscopy **101**, 223

Periplasm; Enzyme kinetics; Alkaline phosphatase; Beta-lactamase; Surface catalysis **101**, 37

Phosphoinositide; Cytoskeleton; Actin; Gelsolin; PIP_2; Lipid–protein complex **101**, 93

PIP_2; Phosphoinositide; Cytoskeleton; Actin; Gelsolin; Lipid–protein complex **101**, 93

Plant sterols; Keratinocytes; Fluorescence polarisation **101**, 255

Plasma; Membrane phospholids; Actin filament **101**, 81

Proteins; Ceramide signaling; Membranes **101**, 109

Pyrazole derivatives; Conjugated keto-allene fatty ester; NMR spectroscopy; Synthesis; Ultrasound **101**, 237

Resonance energy transfer; Metal–ligand lipid conjugate; Model membrane **101**, 243

Sphingosine; DNA interactions; Cationic GUV; Microinjection; Endocytosis **101**, 123

Surface catalysis; Enzyme kinetics; Periplasm; Alkaline phosphatase; Beta-lactamase **101**, 37

Surface specificity; Charged lipids; Membrane electrostatics; Molecular recognition **101**, 3

Synthesis; Conjugated keto-allene fatty ester; NMR spectroscopy; Pyrazole derivatives; Ultrasound **101**, 237

Ultrasound; Conjugated keto-allene fatty ester; NMR spectroscopy; Pyrazole derivatives; Synthesis **101**, 237
